Dear Sir/Madam

I am **LOEM SREYTHINH**, a fresh graduate with a Bachelor of Science in Information and Technology from the National University of Battambang. During my academic years, I had an excellent opportunity to join the **ITC** team under the project of LBE to develop the “Plagiarism” for one year. In addition, I have also interned as a Web Developer trainee at the **Yamato Green Company**, as a data entrée and had an opportunity to learn OOP Java and Laravel API. My specialisation is in the area of creating an attractive “Responsive System” using HTML, CSS, Bootstrap, JavaScript, Tailwind, and PHP.

In addition to my specialization above, I am an independent, creative, hardworking, enthusiastic, and, most importantly, a strong-willed learner and leader during my four academic years. During my academic years and the experience of working with the team from the **ITC** and as an intern at the **Yamato Green Company**, I am a hardworking and responsible student who can accomplish all the requirements on time without any delay in a highly responsible manner with neat and well-organized work. More importantly, I am the kind of student and intern who is enthusiastic and a strong-willed learner who is always keen on learning from teachers and co-workers about anything new and related to my subject matter. In the class, I always lead my group to accomplish the challenging tasks my lecturers gave. More significantly, I am patient, tolerant and able to work under pressure.

With my qualifications, working experiences, and working attitude as a student and an intern, I am highly capable, efficient, competent, potential and applicable enough to be taken into consideration as a qualified candidate for your company.

I am looking forward to hearing from you as soon as possible.

Sincerely yours,
LOEM- SREYTHINH
